Please take a minute to read this important information about your new

Wash Day Laundry Soap: Like all Liquid Soap Products, Wash Day Laundry Soap is extremely concentrated with pure soap. As a result, you only need 1/2 ounce of Washday Laundry Soap Per Load.

Top Loading Washers:

- Fill Washer with water (no clothes).
- Deposit 1/2 ounce of Wash Day Laundry Soap into water.
- Allow Washer to run on Wash Cycle for 1 minute with no clothes. This will ensure that the Wash Day Laundry Soap mixes well with the water.
- Stop machine, add Clothes and then start machine allowing it to continue on it's normal wash cycle.

Front Loading Washers:

- Deposit 1/2 ounce of Wash Day Laundry Soap in your soap depository.
- Select Wash Cycle and start machine.

Helpful Tips:

- Soap sudsing is a chemical agent that Liquid Soap Products refrains from putting in our products.

Sudsing agents do not help the cleaning process and are merely used to make you think your product is working. While your new soaps will not produce as much suds as your retail products, their pure soap base combined with your clean water will work more effectively.

- When used as directed, Wash Day Laundry Soap is **High Efficiency (HE) Compliant**.
